

BEFORE

Original painting by Grant Wood (February 13, 1891 – February 12, 1942)

Date: 2013

Description: Project created for a family member to hang up on their wall because they are a big fans of this painting and batman.

AFTER

Application: Photoshop and Illustrator CS6

Procedure used: First I had to separate all images using a combination of masks, layer masks, and my favorite color range for more sophisticated selection. Then used layer-styles with gradients applied over textures, also used beveling to recreate cool lighting effects to show the direction of the light source.

PHOTO REFERENCES

Resources: All images were collected from resources off the internet and reformatted for printing purposes. For instance I used actions in Photoshop for batch sizing and saving from Jpeg to EPS, at a resolution of 300 pixels per inch. The action includes size down, unsharp mask, despeckle, and re-save to eps. Actions really save me time when I need to do multiple tasks over and over again.
